

**Working
mathematically
together using
scales and
measuring cups**

**By Harry
and Josh.**

**We found out
that container 1
and container 2
held the same and
container 3 held
the least in grams**

**In maths we had to
find out which
container held the
most volume and
capacity.**

*We estimated that container
1 held the most and
container 2 held the second
amount and container 3 held
the least*

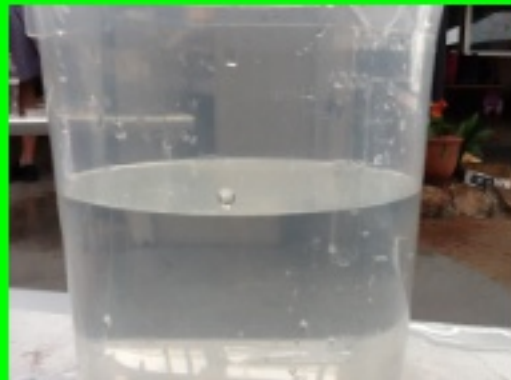

Glossary

Capacity

capacity is the amount it holds which in this case is the water used in litres and ML

Volume

volume is the amount it can take up. in this case it is used with pasta used in in KG and Gs

A thank u
message

Thank you for
reading our
awesome book.
We hope u
enjoyed it as
much as we
did.
