

Using iMessage in iOS8

iMessage is a built-in messaging app available on Apple devices such as iPads and iPhones that allows the sending of text, photos, videos, links and more. It allows you to send messages to one or many people at once. Although iMessage is a useful tool, it is not allowed to be used during school hours and you may wish to restrict access to it permanently. Here are some guidelines for disabling the iMessage app and for managing group messages.

Please note, that this information is relevant to devices running iOS8 only.

Disabling the iMessage App

Step 1 : Go to 'Settings > Messages' and turn iMessage OFF

Managing Group Messages

If you have been included in a group message, the word 'Group' will appear at the top of the screen.

You can manage the group message settings by tapping on 'Details'.

		Share My Location		
		Do Not Disturb		Muting Notifications
		Mute notifications for this conversation.		
		Leave this Conversation		Leaving a Group Message

Muting Notifications : If you do not want to receive a notification (and beep) every time a message is sent to the group, turn 'Do Not Disturb' ON.

Leaving a Group Message : If the group message has more than 3 participants, you can leave the group message by tapping on 'Leave this Conversation'.

Blocking a Contact : You can block a contact who is part of the group message by clicking on the 'i' button next to the contact and then on 'Block this Caller'.

			llock this Caller		

Removing a Participant from the Group Message : If the group message has more than 3 participants, the person who initially created the group message can remove a participant from the message by clicking on 'Details, then swiping the name of the person from right to left and then tapping 'Delete'.

Deleting a Group Message : Any message can be deleted by tapping 'Edit', then selecting the message(s) and then tapping 'Delete'. However, if you are still a part of a group message and another message is posted, the group message will re-appear.
